

# IMAAVY® (nipocalimab-aahu)

## What are the possible side effects of IMAAVY?

IMAAVY may cause serious side effects, including:

### Infections<sup>1</sup>

Infections are a common side effect of IMAAVY that can be serious. Receiving IMAAVY may increase your risk of infection. Tell your healthcare provider right away if you have any of the following symptoms of infection:

- Fever
- Chills
- Shivering
- Cough
- Sore throat
- Fever blisters
- Burning when you urinate

### Allergic (hypersensitivity) reactions<sup>1</sup>

Allergic reactions may happen during or up to a few weeks after your IMAAVY infusion. Get emergency medical help right away if you get any of these symptoms during or after your IMAAVY infusion, which may be part of a serious allergic reaction:

- Swelling of your face, lips, mouth, tongue, or throat
- Difficulty swallowing or breathing
- Itchy rash (hives)
- Chest pain or tightness

### Infusion-related reactions<sup>1</sup>

Tell your healthcare provider right away if you get any of the following symptoms during or a few days after your infusion of IMAAVY:

- Headache
- Rash
- Nausea
- Fatigue
- Dizziness
- Chills
- Flu-like symptoms
- Redness of skin

The most common side effects in people with generalized myasthenia gravis (gMG) treated with IMAAVY include<sup>1</sup>:

Infection in parts of your body that you use for breathing (respiratory tract infection)

Swelling in your hands, ankles, or feet (peripheral edema)

Muscle spasms

- If you have a reaction during your IMAAVY infusion, your healthcare provider may decide to give IMAAVY more slowly or to stop your infusion.
- These are not all the possible side effects of IMAAVY.
- Call your doctor for medical advice about side effects. You may report side effects to the Food and Drug Administration (FDA) at 1-800-FDA-1088.
