

TREMFYA® (guselkumab)

What is the dosing schedule of TREMFYA® for ulcerative colitis?

Dosage form and strengths¹

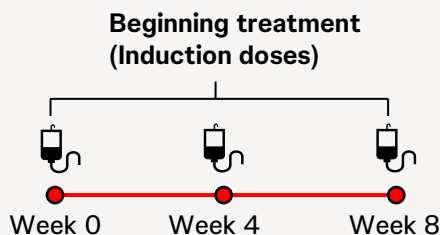

-  **Intravenous infusion:**
- 200 mg/20 mL (10 mg/mL) solution in a single-dose vial

Subcutaneous injection:

- 
- 100 mg/mL in a single-dose One-Press patient-controlled injector
 - 100 mg/mL in a single-dose prefilled syringe
 - 100 mg/mL in a single-dose prefilled pen (TREMFYA PEN)
 - 200 mg/2 mL in a single-dose prefilled pen (TREMFYA PEN)
 - 200 mg/2 mL (100 mg/mL) in a single-dose prefilled syringe

Recommended dosage schedule¹

- 1** The beginning (induction) doses of TREMFYA® will be given:
- Through a **vein in the arm** (intravenous infusion)
 - In a healthcare facility **by a healthcare provider**

The recommended induction dosage of TREMFYA is **200 mg** given by intravenous infusion over **at least 1 hour** at **Week 0, Week 4, and Week 8**.

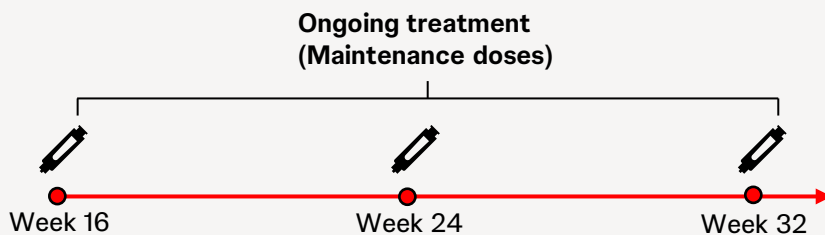

TREMFYA® (guselkumab)

What is the dosing schedule of TREMFYA® for ulcerative colitis?

2 After completing the beginning (induction) doses:

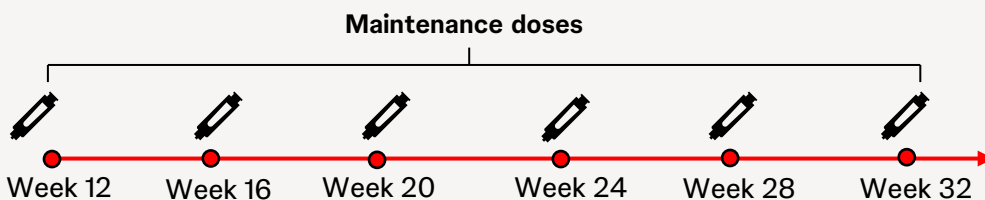

- Patients will receive TREMFYA as an **injection under the skin** (subcutaneous injection) from the following 2 options
- Your healthcare provider will determine the best treatment option for you

Option 1:

TREMFYA **100 mg** given as a subcutaneous injection at **Week 16, and then every 8 weeks.**

Option 2:

TREMFYA **200 mg** given as a subcutaneous injection at **Week 12, and then every 4 weeks.**

If your healthcare provider decides that you or a caregiver may be able to give your injections of TREMFYA at home, **you should receive training** on the right way to prepare and inject TREMFYA before attempting to inject.

Do not try to inject yourself until you have been shown the right way to give the injections by your healthcare provider.
